Usborne and wife.

The City of Peking will arrive on Saturday morning from San Francisco and the Miwera the following (Sunday) morning, from Victoria. Both these steamers have been delayed in sailing.

The steamer Kilohana arrived yesterday morning at 3:45 o'clock and not on Wednesday, as otherwise reported. Purser Archie Turner reports northwest wind and strong northerly swell at Kilauea and a light northwest wind in the channel.

Amongst the recent charters reported at New York are included ten American ships one American and one Hawaiian bark, to load sugar at Honolulu for the Delaware Breakwater, for orders, giving business to 23,658 tons of sailing vessels.

The steamer W. G. Hall, from Kauai ports; Claudine, from Maui ports, and Kinau, from Hawaii ports, will arrive on Saturday morning instead of Sunday morning next. This is in order that the officers and crews may spend Christmas at home. Nearly all the Inter Island boats will be in by Sunday.

The United States training ship Adams, at present anchored off Mare island, is still awaiting the arrival of her batteries from the East. They should have been there some time ago, and are expected any day now. When her guns arrive the training-ship will start out on a cruise which will occupy nine months, and during which Honolulu, Samoa, China and Japan will be visited.

Capt. Cameron, of the steamer Claudine, had a laugh on his arrival last Sunday at the scale he had unconsciously given the waterfront on his departure last week, in anchoring off the harbor while awaiting the men who had lighted the channel buoys, to get aboard the steamer. Not only is Capt. Cameron one of the most cautious but also one of the most efficient mariners on the islands. He is probably the only captain in the inter-island traffic who keeps up his practice in navigation. Capt. Cameron takes observations daily and is already supplied with the nautical almanacs for the coming year. This veteran of the seas asserts that he would rather take time from his chronometer any day than the 1:30 note of the steam whistle.
